ABOUT ME

Detail-oriented and reliable Remote Professional Assistant with 5+ years of experience supporting founders, teams, and digital projects in fast-paced environments. Strong background in operations support, documentation, scheduling, project follow-up, and remote collaboration. Known for high responsibility, clear communication, and the ability to bring structure to complex workflows.

I combine organizational strength with a technical and AI-aware mindset to increase efficiency, clarity, and consistency in daily operations.

WORK EXPERIENCE

Business & Programming Mentor | Tose'e Gar Academy **Remote | 2023 - 2025**

- Supported and coordinated learning paths for 100+ developers, ensuring follow-ups, progress tracking, and structured communication.
- Managed schedules, session planning, documentation, and internal reports.
- Acted as a consistent point of contact between mentors, students, and management.
- Helped simplify complex concepts into clear, actionable steps.

Operations Support & Project Coordinator | Freelance Projects **Remote | 2020 - 2025**

- Assisted founders and small teams with daily operations, task prioritization, and workflow organization.
- Coordinated project timelines, documented requirements, and prepared progress summaries.
- Managed emails, follow-ups, and communication across technical and non-technical stakeholders.
- Used AI tools to improve documentation speed, clarity, and accuracy.

WORK EXPERIENCE

Front-End & Product Support - Community Platform (EU-based Project) Remote | 2024 - 2025

- Created the front end of a community platform for Iranians in Europe. Used Laravel, Vue.js, and MySQL.
- Enhanced UX/UI, mobile-first design, and accessibility using Figma.
- Defined features, created technical specifications, and oversaw beta testing.

Idea Designer and Full-Stack Developer with Laravel 2020-2021

- Delivered a custom school management system that improved operational efficiency and reduced administrative tasks by over 40% through seamless integration of student records, grades, and scheduling.
- Created a comprehensive booking system for beauty salons, integrating online reservations with a custom management panel and user-friendly payment system.
- Developed an API for sending real-time notifications for customer support, significantly improving customer service response time.

STP Analysis Tool 2024

- <https://zahradev1991.github.io/stp-analysis-tool/>
- A web app for Segmentation, Targeting, and Positioning. Built with Python (Flask), HTML, CSS, and JS. Integrated Cohere AI API and PDF report generation. Link.
